SIMS Peer Mentors

Program Dates: August 17-29, 2025

The Summer Institute in Mathematics and Science (SIMS) is a 2-week academic preparation and research training program for newly admitted UCSB first-year students majoring in STEM. We aim to increase the graduation and career success of low-income, first-generation, and underrepresented STEM students.

DESCRIPTION:

- Developing and leading community, team building, and professional development activities such as workshops and group socials
- Helping acclimate incoming first-year STEM students to the university environment
- Supporting students with their research modules and academic assignments
- Serving as residential assistants during the 2-week program

BENEFITS:

- \$2,500 Stipend for training/program
- Room/board duration program
- Hone management, leadership, and communication skills
- Expand your professional network

ELIGIBILITY:

- Science, engineering, or mathematics majors
- Mentoring & leadership experience
- Research experience
- Strong communication and teamwork skills
- Not enrolled in summer courses during the program dates
